Supplementary Table 2 Summary parameters of the multiple regression model

Model Summary	
Number of observations	723
F(12, 710)	34.8
Prob > F	<0.001
R-squared	0.370
Adj. R-squared	0.359
Durbin-Watson-Statistics	2.006
Assumption of homoscedasticity	Not violated per balanced distribution of residuals around baseline
Assumption of normality and linearity	Not violated per Q-Q plot
Variable entry method	Simultaneous entry
